CDE PROGRAMME & HANDS ON

DEPARTMENT OF CONSERVATIVE DENTISTRY AND ENDODONTICS IN ASSOCIATION WITH 3M

17.05.2023

The Department of Conservative Dentistry and Endodontics, in association with 3M, organized a CDE program on the 17th of May 2023. The program focused on the topic of "CEMENTATION PROTOCOL OF INDIRECT RESTORATION" and featured Dr. Manikya as the esteemed speaker.

Dr. Manikya, a renowned expert in the field, shared her knowledge and experience with the attendees. The presentation covered the intricacies of the cementation protocol for indirect restorations, providing valuable insights and practical guidance.

Hands on session was conducted to provide practical guidance and training to the attendees.

During the hands-on session, Dr. Manikya demonstrated the step-by-step process of cementation for indirect restorations. Participants had the opportunity to observe and actively engage in the various techniques and procedures involved in achieving successful cementation outcomes.

They provided detailed explanations, emphasizing important factors such as material selection, surface preparation, and proper adhesive techniques.

The session equipped the participants with the necessary skills and confidence to successfully implement the cementation protocols for different types of indirect restorations in their own clinical practices.
