

An Analytical Approach to Oral Biology and Oral Pathology

The Department of Oral and Maxillofacial Pathology & Microbiology at Rajarajeshwari Dental College successfully organized a Continuing Dental Education (CDE) programme on 16th March 2026. The session, titled “An Analytical Approach to Oral Biology and Oral Pathology,” aimed to enhance students’ understanding of the scientific basis of oral diseases and their clinical implications.

The event commenced with a warm welcome address by the Principal, Dr. Girish HC, who emphasized the importance of continuous learning and staying updated with advancements in dental sciences. This was followed by an address from the Dean, Dr. Edwin Devdoss, who highlighted the relevance of integrating oral biology with pathology for accurate diagnosis and effective patient care.

The Head of the Department, Dr. Savita JK, introduced the esteemed speaker, outlining her academic achievements, clinical experience, and valuable contributions to the field of oral pathology.

Dr. Suma S provided an in-depth and analytical overview of oral biological processes and their correlation with pathological conditions. Key topics included the fundamentals of oral tissue development, mechanisms of disease progression, and the importance of histopathological evaluation in diagnosis. The session also highlighted a systematic approach to clinical examination, radiographic interpretation, and differential diagnosis.

The interactive nature of the programme allowed students to actively participate, ask questions, and engage in meaningful discussions. This not only enhanced their learning experience but also fostered a deeper interest in the subject.

The programme concluded with a vote of thanks delivered by Dr. Varsha VK, who expressed heartfelt gratitude to the speaker for her insightful presentation. She also thanked the management, faculty members, and students for their enthusiastic participation and support in making the event a success.

Overall, the CDE programme was highly informative and well received by all attendees. It successfully inspired students to adopt an analytical and integrated approach to understanding oral biology and pathology, thereby strengthening their clinical and diagnostic skills.
